emailing [admin@mms.org.uk](mailto:admin@mms.org.uk)]*
- 11.30 am Coffee
- 12 noon **PRESIDENTIAL ADDRESS of Dr Bronwyn Kerr**  
(Consultant Clinical Geneticist/Clinical Director, Central  
Manchester University Hospitals NHS FT)  
"What's in a name"
- 12.30 pm Annual General Meeting of the MPC (Club Members only)
- 12.45 - 1.45 pm LUNCH  
(which must be booked in advance - see booking form)

# Programme—Afternoon

## Symposium "Teratogens, pre and postnatal?"

Chaired by - **Dr Bronwyn Kerr**

- 1.45 pm      Screening of The National Organisation for Fetal Alcohol Syndrome-UK DVD which has interviews with children who have FAS, their mothers and doctors followed by:  
"The challenges of parenting in FAS"  
**Ms Susan Fleisher** (Executive Director, NOFAS-UK London)
- 2.30 pm      "Alcohol embryopathy—a role for the clinical geneticist?"  
**Dr Alan Fryer** (Consultant Clinical Geneticist & Clinical Director of Genetics, Liverpool Women's NHS Foundation Trust)
- Dr Fryer will discuss the fact that the spectrum of alcohol embryopathy disorders are diagnoses of exclusion. The clinical geneticist is often asked to see these children to try and exclude other conditions. This talk will explore the main conditions that enter the differential diagnosis.
- 3.00 pm      "FASD, is it really something paediatricians need to know about?"  
**Dr Raja Mukherjee** (Consultant Psychiatrist, Surrey and Borders Partnership NHS Foundation Trust)
- This talk will look at the prevalence and increase in alcohol consumption in young women as well as the risks this brings to the foetus from prenatal exposure. It will look at different diagnostic methods, showing examples of actual cases before highlighting the difficulties and behavioural presentations commonly seen in this group of children.
- 3.30 pm      Coffee

# Programme—Afternoon

- 4.00 pm "Long-term consequences of early institutional deprivation—overview of findings from the English and Romanian Adoptees (ERA) study"  
**Dr Robert Kumsta** (Postdoctoral Research Fellow, MRC Society, Genetic & Developmental Psychiatry Centre, Institute of Psychiatry, King's College London, and School of Psychology, University of Southampton)
- The English and Romanian Adoptees (ERA) study is a longitudinal study investigating children adopted from highly depriving Romanian institutions into the UK in the early 1990s. The ERA study is a natural experiment that allows the examination of the effects of sudden, precisely timed, and radical change from a profoundly depriving environment to a somewhat above-average one in the adoptive families. Over the past 15 years, the effects of early institutional deprivation on a wide range of developmental outcomes have been studied. This talk will give an overview of the findings, with a focus on psychological impairments, effects on brain structure and function, and the moderating role of genetic factors.
- 4.30 pm *Gaisford Lecture*  
"Fetal anticonvulsant exposure"  
**Professor Jill Clayton-Smith** (Honorary Professor in Medical Genetics, University of Manchester and Consultant Clinical Geneticist, Central Manchester University Hospitals NHS FT)
- 5.30 pm Close
